

Idaho State Department of Agriculture

IDAPA 02.06.41 Rules Pertaining to the Idaho Soil and Plant Amendment Act of 2001

June 12, 2019

Jared Stuart, Facilitator

Present: Colby Cameron, Division of Financial Management; Katy DeVries, Office of Attorney General, ISDA; Lloyd Knight, ISDA; Jared Stuart, ISDA; Janis Perry, ISDA.

AGENDA ITEMS

WELCOME

Jared Stuart convened the meeting at 9:30 am. After introductions, Lloyd Knight explained that all three rules being negotiated today are similar in that they incorporate by reference an official publication that has common and accepted regulations for feed, fertilizer, or soil and plant amendments. Historically the three rules included sections that are included in the publications. However with the Red Tape Reductions, the staff has identified duplicated information that will be struck from the rules. Each year to update the incorporations by reference the rules are opened. Jared Stuart stated that this comparison of duplications started a year ago.

Jared Stuart identified the changes to the incorporations by reference that will be made in IDAPA 02.06.41:

- Section 004.01 “2020 Official Publication of AAPFCO;”
- Section 004.02 “2013 Merck Index,” 15th Edition; and
- Section 004.03 “2019 Official Methods of Analysis (OMA) of the AOAC,” 21st Edition.

We also discussed the shortening of the title of the rule to “Rules Pertaining to Soil and Plant Amendments.” This will occur with the reauthorization of all rules to provide consistency across the department.

Colby Cameron shared the rulemaking processes that are still to come after the publication of the Omnibus Rulemaking Notices on June 19. He indicated that the archived versions of the rules will have a special 2019 section and that historical dates in the rules will be maintained unless changes have been made in the rule.

Jared Stuart adjourned the meeting at 10 am.

Respectfully submitted by Janis Perry
